

DB Fence Panel 1m00

Dutch Barrier Fence Panel is a premium alternative to the standard police barricade, delivering a visually appealing crowd control solution on a compact, custom-built base. Fitted with both straight and vario section uprights, it excels at creating smooth corners in low-pressure areas, all while maintaining a sleek, professional look.

- a state of the art aluminium barrier system, built for fast setup and optimised crowd control solutions -

About

Dutch Barrier's founders and partners boast over 50 years of experience in high-end manufacturing, layout design, and crowd control solutions. We saw an opportunity to start afresh with an entirely new stage barrier design, preserving the best features and improving upon them where possible.

Why

We believe in quality, safety, and creating an unforgettable experience. The safer an audience is, the more comfortable it will feel at your event.

How

We achieve quality and safety by leveraging 50-plus years of combined original creators' experience to reinvent the to date world's best barrier system from the ground up, making it accessible to anyone who might be in the market for such a system, either to rent or to buy.

What

Dutch Barrier® is a state-of-the-art lightweight aluminium barrier system offering an innovative combination of straights, special sections and storage solutions. Create ingenious crowd control solutions, enjoy quick setups and enhanced handling, and benefit from an equal footprint for every dolly during transport or storage.

Oh, and there's one more thing...

Dutch Barrier® is not just a brand. It's a state-of-the-art engineering company where customer support is an integral part of the mission rather than being hidden behind the impersonality of an online promise.

DB Fence Panel 1m00

The fence panel design was originally created at the request of the Foo Fighters, who were looking for a visually appealing way to separate the VIP area on stage. It combines functionality with aesthetics, offering a clean and professional look without compromising safety.

- a state of the art aluminium barrier system, built for fast setup and optimised crowd control solutions -

Technical Specs

- A flat steel base added to the solid welded aluminium straight and vario uprights, creating a stylish alternative to traditional police barricades
- One unit measures 1000 mm wide and 1200mm tall
- A rounded top rail and welded end caps for the audience's comfort and safety
- Flat steel baseplate with a small footprint and rubber underside to prevent sliding on smooth surfaces
- Internal solid blocks allow for added strength and easy insertion of bolts, improving overall durability
- Straight and vario sections connect at the bottom and top on either side using two standard Dutch Barrier bolts. The top bolt is optional due to the integrated pin but adds stability when installed
- Seamlessly connects to any section of the Dutch Barrier system
- Also available in black
- Weight: Straight upright 14.5 kg, Vario upright 16.5 kg, Steel base 9.6 kg
- Use in high crowd pressure areas: ●○○○ 1/5

- a safe show for every row -
